## 380LM

### Remote Light

Brighten up a dark garage or workspace with the LiftMaster® Remote Light. Made exclusively for use with the Residential Jackshaft Opener (model 3800), this remote light works just like a traditional garage door opener light, but can be positioned on the ceiling anywhere in the garage.

- **For use exclusively with the LiftMaster Residential Jackshaft Opener** (model 3800)
- Provides **200 watts of light with adjustable light time delay**
- Lights are controlled by opener activation or control panel light button
- **Add as many lights as you wish** – perfect for brightening up a dark garage or workspace
